Subject: Internet Survey

Tony;

I would like to speak with you again regarding locating/collecting nitrosamine related documents for the consensus groups work. You expressed some interest in getting more RJR documents from tobaccoresolution.com. I tried a quick survey using terms such as "TSNA, NNN, NNK, tobacco specific nitrosamine, nitrosamine, nitrosonornicotine, nitrosoanatabine, nitrosoanabasine, nitrosation, and nitrosating agents". This produced about 650 hits, of course a huge number of these will be duplicate copies, folder covers etc. Does it make sense to produce copies of all this (assuming I can talk someone into the job)? If not, how select a useful subset?

A second point is that I just became aware that access is now possible to Gallaher documents at their web site. Use of "nitrosamine" produced 469 hits and I have not seen a single one of these documents as yet. Did not want to invest any time yet, in case you had already seen information from this site.

Robin and I will try to call you soon to continue discussion on these and other nitrosamine document topics.
Bob
